

# Apple Academy Developer

## Foundation

# Low Price

# Team members & roles

**Raheil Ali** : design the Order page , payment

Creat the presentation

**Rahaf Adel** : The owner of the idea

design the search page , account page and basket page .

In xcode , create the home page and the basket page..

**Basemah Almuhsen**: I modified the idea of app ,Design the offer view and category and product details

Design logo for app

collect all views and make investage between them

**Amal Alotaibi** : In xcode create the Search page

**introduction**

# Structure the story you want to tell

## •Engage Phase

using CBL we determine big domain “shopping” Then it gets smaller and find a valuable idea that serves the community within the scope of shopping.

# Structure the story you want to tell

## •investigation Phase

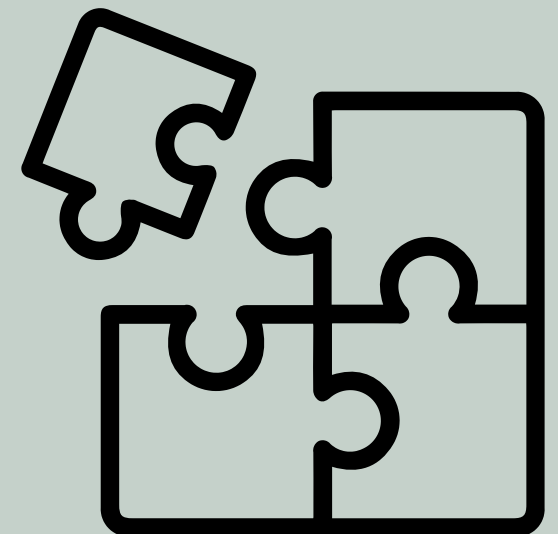

**problem statement** : Food costs are rising, especially during the month of Ramadan, and it takes time and effort to look for offers in different supermarket , This is where the idea started .

# Structure the story you want to tell

## • **investigation Phase**

**solution concept :** Compare the prices of products in several supermarkets With the ability to specify a specific spatial range

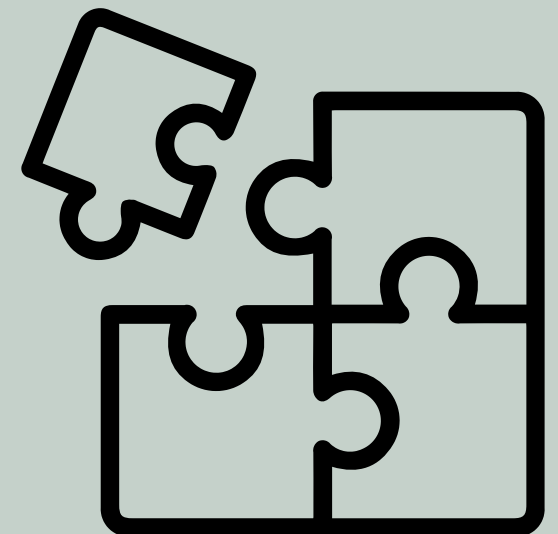

# Structure the story you want to tell

## •Investigation Phase

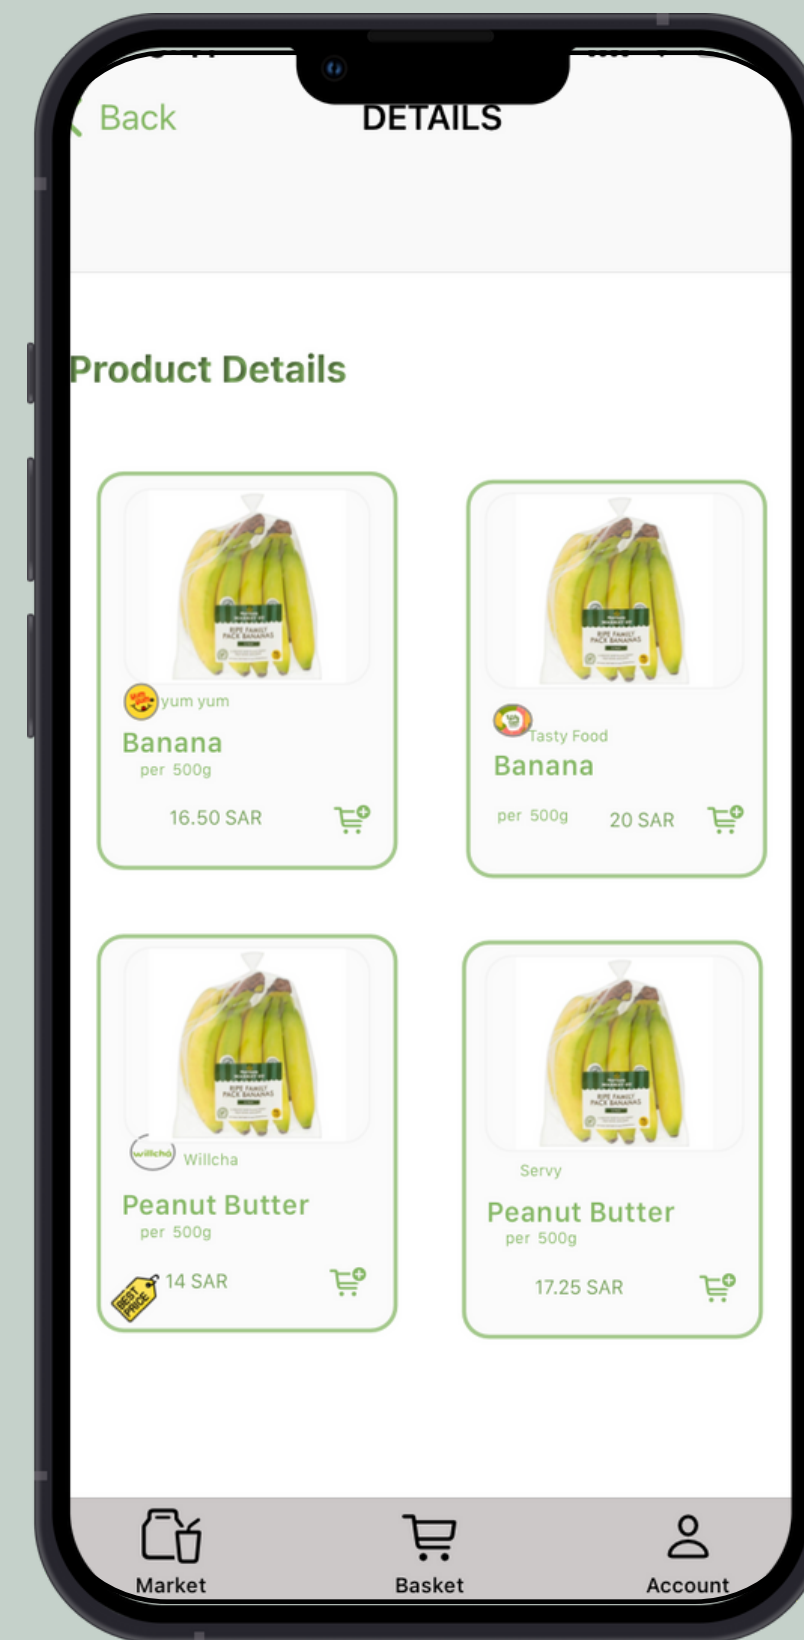

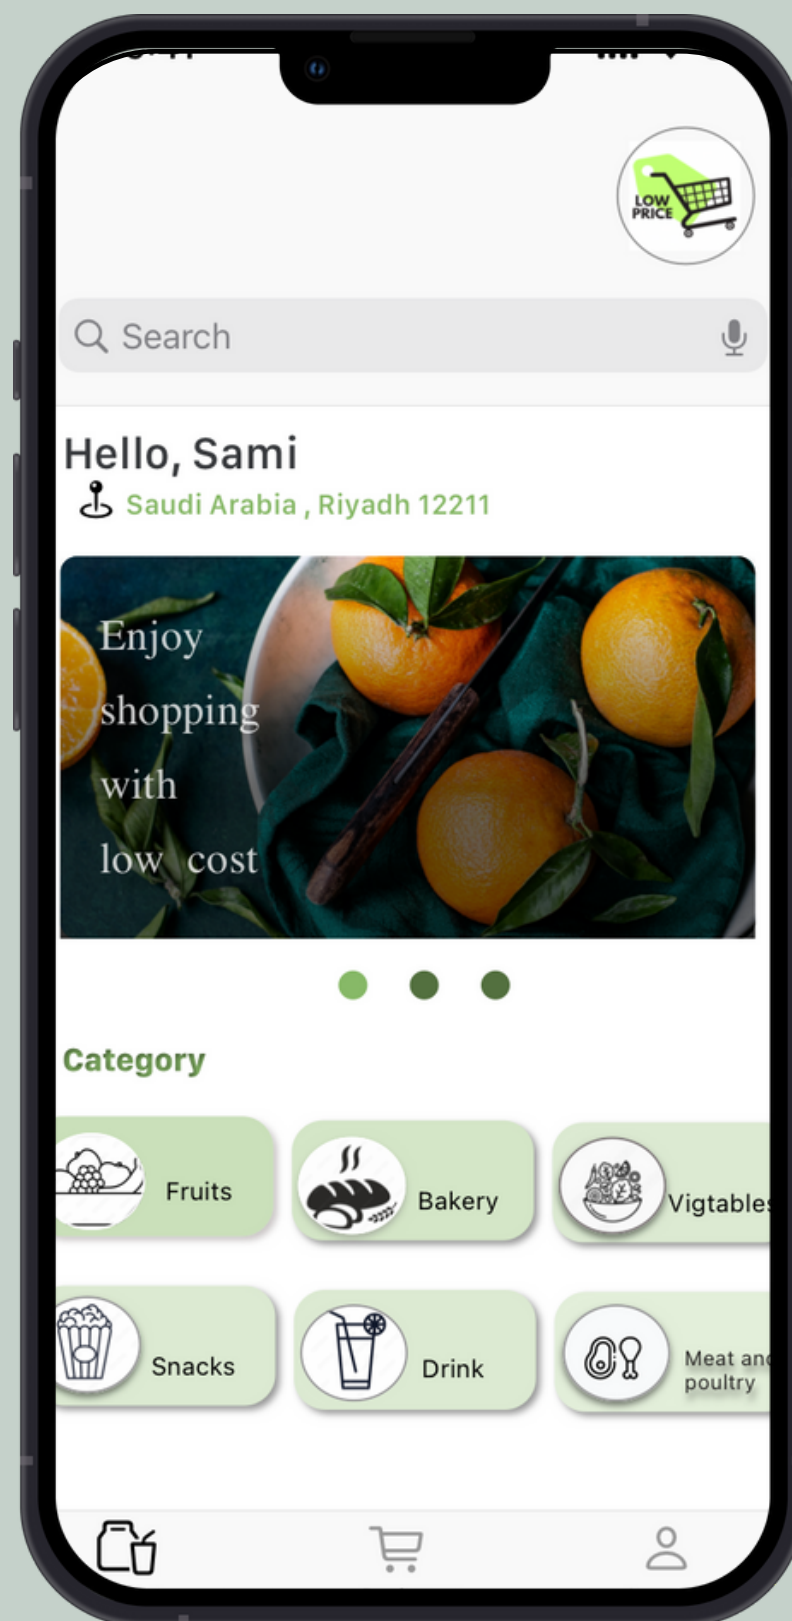

### **The app's features:**

- 1-Compare product prices in different supermarkets
- 2-select a specific range for research
- 3-collect products and purchase them from more than one store to ensure the best prices

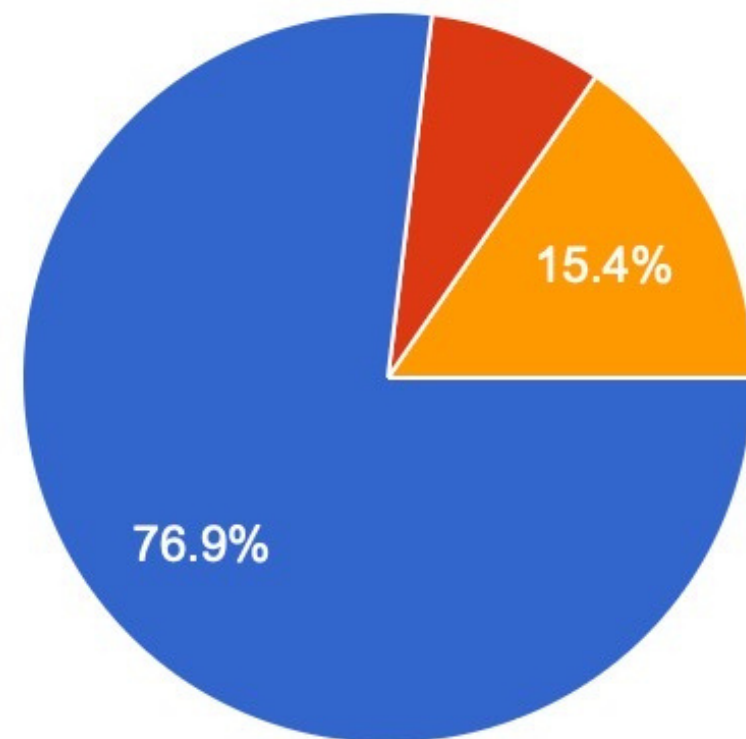

# Demo

? Do you wanna to include mini markets

13 ردًا

- Yes
- No
- Maybe

## ? What other features do you suggest

13 ردًا

!👍 coupons to the customer who orders more than 10 times from the store. It's a good idea

The advantage of showing options faster

Delivery of the order as soon as possible with the best price from the selected store. The store offers .discount coupons to the customer who orders more than 10 times from the store

I dont know

Nothing

Idk

.View an available offers and discounts

الفلتره حسب المنتج، مب بس حسب السوبرماركت

See Click Flyer App

# Conclusion:

- **Add delivery service**
- **Create an interface for the seller and the possibility of using the application**
